ACHIEVE WOODGRAIN AESTHETICS WITH ALUMINIUM CAPABILITIES

TIMBER-LIKE ALUMINIUM LINEAR CEILING SYSTEM

Bring the warmth of wood to your ceiling with the strength of aluminium. Our wood-look aluminium ceilings offer a stunning and natural aesthetic, perfect for creating a beautiful indoor or outdoor space.

Made with aluminium coated in realistic woodgrain finishes, it delivers the beauty of natural wood alongside the unmatched durability of aluminium: resistance to water, fire, and corrosion.

Here's why you'll love them:

- **Realistic wood look:** Choose from a wide range of wood grain colors to find the perfect match for your design.
- **Built to last:** Enjoy the beauty of wood with the added benefits of aluminium, including water resistance, fire resistance, and corrosion resistance. Plus, the wood-grain coating comes with a 10-year warranty.
- **Versatile application:** These strip ceilings can be installed indoors or outdoors, making them ideal for a variety of locations, from schools and homes to airports and shopping centers.

TIMBER LIKE ALUMINIUM STRIP CEILING SYSTEM

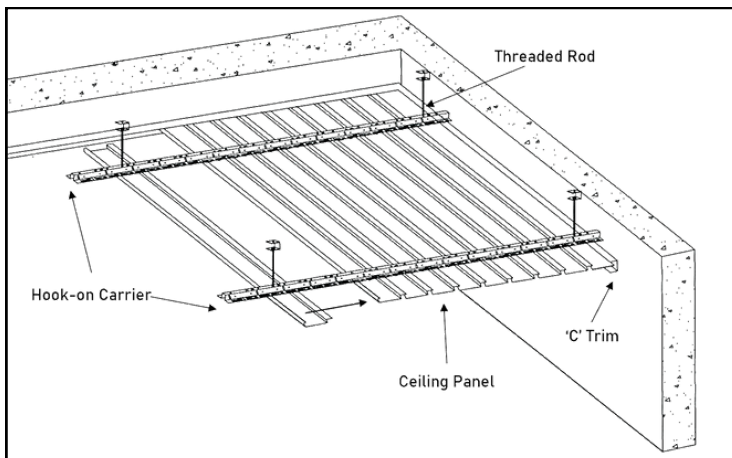

TECHNICAL INFORMATION

Our linear ceiling system consists of threaded rods, C-trim, panel carriers and strip panels. The panel carrier is made of 0.5mm thick steel coated enamel. The width and length of the panels can be customized accordingly to design. After the panels are formed, they will be coated with the woodgrain colour selected. There is a wide range of woodgrain coating available for selection.
