ENSURE GOOD SOUND VENTILATION & EASY TO MAINTAIN

ALUMINIUM BAFFLE CEILING SYSTEM

Baffle ceilings are a popular choice for many modern buildings due to their sleek, contemporary design and acoustics performance. They are exceptional a versatile ceiling solution that can be used in a wide range of settings, from offices and commercial buildings to homes and public spaces.

In addition to their aesthetic appeal, baffle ceiling also offer a range of practical benefits like controlling acoustics, reduce noise levels and enhance lighting. They are easy to install, maintain and clean making them a practical choice for commercial and public areas.

TECHNICAL INFORMATION

Our baffle ceiling system consists of threaded rods, steel carriers, screws and end caps.

The carrier is made of steel with enamel coating. The panels are made of 0.7mm thick aluminium alloy 3003 H24. The width and length of the panels and the spacing between panels are customized accordingly to design.

Our baffle ceilings come with a variety of finishes and colours, allowing you to create a customized look that fits your space's design and style.
