# ADD TEXTURE AND INTEREST TO AN OTHERWISE BLAND SPACE

## ABOUT

### ALUMINIUM FLUTED PANEL SYSTEM

Fluted panels create clean, sleek and consistent lines. This system can be used to beautify walls, or ceilings in homes, offices, shopping centres, schools and recreation facilities.

It is easy to install and removable without the use of any tools. It is suitable for internal or external ceilings or walls.

A wide range of solid or woodgrain colours featuring premium finishing allows this system to be used in all kinds of settings.

## TECHNICAL INFORMATION

Our fluted panel system consists of threaded rods, steel carriers, screws and end caps.

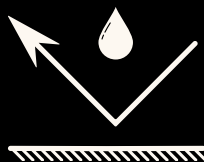

The carrier is made of steel with enamel coating.

The panels are made of 0.7mm thick aluminium alloy 3003 H24. The width and length of the panels, and the spacing between the panels can be customized accordingly to design.

Our fluted panels come with a variety of finishes and colours, allowing you to create a customized look that fits your space's design and style.
